The Aqua League Power Play Classroom Game

Teachers: When the Power Play classroom game concludes, we encourage the use of the following questions to act as a prompt for discussion with your students to help solidify the learning that took place in this hands-on classroom experience. We recommend spending at least five minutes asking your students what they learned and talking about what else they need to know. Feel free to ask your students as many follow-up questions as you'd like.

Reflection and Knowledge Questions

1. Name the four stages of the water cycle.
2. Why is the water cycle important?
3. What percent of the Earth's water is salt water?
