

Help Olivia fill in the graph with how much profit she made each weekend.

To determine profit, you take all sales (including tips) and deduct the expenses. The amount left over is Olivia's profit.

To determine sales, you multiply the number of cups sold by the price per cup.

To determine expenses, use sales receipts to add up all the costs of your supplies (sugar, lemons, cups, markers, poster board, flavored syrup).

Enter Olivia's profits into the graph on the appropriate dates.
