

NEEDS & WANTS

Every day, people make choices when making purchases. Sometimes you buy something because you need it and sometimes you buy something because you want it. A need is something you have to have to survive or complete a task. A want is simply the desire for something that is not needed.

For each item, circle WANT or NEED. When you're finished, give the sheet to your teacher. The correct answers will get you one step closer to escaping the laboratory and winning the game!
